1. Doors on cabinets
   - Min width - 450mm
   - Max height - 4000mm

2. Built in cabinets
   - Min width - 500mm
   - height and depth are not limited but shall be no more than 3500mm (we shall set it up as 4000mm max)

3. External cabinets
   - Min width - 500mm
   - height and depth are not limited but shall be no more than 3500mm (we shall set it up as 4000mm max)

4. Corner cabinets
   - Min width - 500mm
   - height and depth are not limited but shall be no more than 3500mm (we shall set it up as 4000mm max)

5. Wardrobe
   - Min width - 500mm
   - height and depth are not limited but shall be no more than 3500mm (we shall set it up as 4000mm max)

- If a minimum width of 500mm on a cabinet, hinged doors must be used.

- The corner cabinet shall have at least 500mm on each side if it has hinged doors

- If the corner cabinet has sliding doors, then 900mm on each side is the minimum

Textures:
There should be three types/sets of textures:

1. First set of textures: this is the color that the walls, floor, ceiling, boxes, shelves, etc will have. It's going to be a solid color. The colors will be pre-set by the company-level profile when setting up a constructor from their admin panel. You can choose one color only and all the pieces become that one single color.
2. Second set of textures: this is the texture for the doors only. The company-level profile can pre-set available textures from the admin panel as well as a regular user can upload a desired image.
3. Third set of textures: This is only for the frames of the doors. This is only pre-set by the company-profile user from the admin panel. No user uploads available for this.

Example of the textures:
1) First set - https://yadi.sk/i/7d9A24k0tXuBg - https://yadi.sk/i/Pmn41NjwtXuJf
2) Second set - https://yadi.sk/i/bgvtdItwtXuSV

3) Third set - https://yadi.sk/i/W7EIUFl9tXuYB
