# MyDroidDevice – Privacy Policy

Made by Spinnerbox – February 2017

This document contains details about MyDroidDevice an Android application published on Google Play Store: [MyDroidDevice](#)

It is application that is accessing device details about your screen, telephony SIM card and network. However there are no buttons which will share your device properties, so there is no risk of sharing sensitive data.

It is visual application and the device properties are shown in list textually.

You can use it to gather data about all devices you have and perhaps learn about Android development or just learn what are the mobile devices consisted of. Maybe even learn about mobile/telecommunications basics.

The application does not access phonebook, personally identifiable data or other device services.

If you have any questions/problems or found bugs, write me at:
